NOTE

AWAM Telenita's format of recording cases was updated this year. Last year, each survivor who came to us would be recorded as a single case type i.e., SH, DV, etc. This year, we added the option of a second case type into that data set (when needed) for survivors who came to us. So for those who come to us with GBV issues (who would almost always have accompanying mental health issues), we now record this data.
